Caloocan City, Philippines

Education

University of Caloocan City - Bachelor of Science in Computer Science
2023 – Present

Project Experience

Frontend Developer - Pawlar (Integrated IoT Pet Wellness Ecosystem)
November 2025 - April 2026

- Architected a Capacitor mobile application for a unified IoT ecosystem for smart collars, feeders, and doors.
- Synchronized ESP32 telemetry with UI via complex state management for real-time hardware interaction.
- Integrated Cloudinary and PostgreSQL to optimize pet profile media and manage persistent multi-pet logs.
- Facilitated User Acceptance Testing to validate hardware-to-cloud communication reliability.

Frontend Developer - Memoria: Blu's Wonderland (Creative Web Application)
January 2026 - March 2026

- Built a modular 2D engine in JavaScript with custom state management for scalable gameplay features.
- Implemented procedural difficulty scaling and generative patterns using p5.js for adaptive challenges.
- Designed high-performance visual stack using HTML5 Canvas for real-time particle effects and transitions.
- Engineered a localStorage-backed analytics pipeline for persistent score tracking and progression metrics.

Frontend Developer - Coffee on Top (Custom POS System)
September 2025 - December 2025

- Developed responsive POS interface using ReactJS and Tailwind CSS
- Optimized UI filtering and search performance for large historical datasets, enabling rapid retrieval of customer records.
- Integrated Express with MySQL to ensure persistent storage and real-time transaction synchronization.

Leadership

Creative Committee Head - Computer Science Council
July 2025 - Present

- Mentored a 7-member creative team, managing timelines for all council promotional assets and branding.
- Spearheaded visual direction to align the organization's technical identity with its core mission.

Technical Skills

Languages: JavaScript, HTML5, PHP, C#, SQL (MySql & PostgreSQL)
Frameworks: React, Next.js, Node.js, Express.js, Laravel, Tailwind CSS, p5.js
Developer Tools: Git, GitHub, Websockets, Capacitor, Cloudinary, Google Maps, Sanity
Creative Suite: Figma, Adobe Photoshop, Canva, Procreate, Blender
